EDUCATION

University of Michigan - Ann Arbor	Expected Graduation: May 2028
B.S. Honors Mathematics & Statistics, Minor in Computer Science	GPA: 3.9/4.0
Relevant Coursework: Honors Analysis · Probability Theory · Stochastic Processes · Combinatorics & Graph Theory · Deep Learning · Machine Learning · Reinforcement Learning	

EXPERIENCE

OpenAI <i>Incoming Software Engineering Intern</i>	Sep 2026 – Dec 2026
Embedder YC S25 <i>Incoming Software Engineering Intern</i>	Jun 2026 – Aug 2026
Flowly AI <i>Founder · YCombinator Fellow</i>	Feb 2026 – Present
- Architected Go API gateway with compiled DAG engine orchestrating 500+ daily workflows. - Engineered Docker/gVisor sandboxed execution pipeline isolating 10K+ daily financial transactions. - Shipped Apache Arrow analytics pipeline achieving <10ms vectorized queries across 5+ data sources.	
Tencent <i>Senior Software Engineer</i>	Jan 2026 – Jun 2026
- Scaled cloud infrastructure to 10,000+ concurrent jobs serving 50+ internal engineering teams. - Designed TB-scale NAS storage with fault-tolerant networking, cutting data retrieval latency 40%. - Automated QA validation pipelines in Python, reducing manual verification effort by 30%.	
Univ. of Michigan & Cambridge Univ. <i>ML & Algorithm Developer</i>	Jun 2023 – Dec 2025
- Developed MATLAB/Python simulation framework evaluating 6-DOF path planners over 10K+ trials. - Optimized A* and RRT convergence 35% faster in dynamic environments (ICCSM 2024 published). - Parallelized parameter sweeps on 128-node Slurm cluster, cutting experiment runtime to hours.	

PROJECTS

ML Integral Solver	Sep 2025 – Present
- Designed neural-symbolic solver via Transformers, SymPy, and GNN pipelines at 92%+ accuracy. - Engineered GPU inference pipeline with L-BFGS optimization, solving queries in <200ms. - Trained 44.8M-parameter Transformer on 2.1M integral pairs, cutting invalid outputs by 60%.	
Nightfall Minecraft Server	Jun 2022 – Jun 2025
- Founded distributed Minecraft network scaling to 2M+ registrations and 2K daily active players. - Delivered sub-50ms backend via NGINX, MySQL, Redis, and custom PHP services at 99.9% uptime. - Optimized async I/O and Redis caching to sustain 5K+ req/sec with <15ms p99 cache latency.	

TECHNICAL SKILLS

Programming Languages: PHP · C++ · Java · JavaScript · Python · MATLAB · TypeScript
Infrastructure and Tools: Ansible · Docker · Git/GitHub Actions · Kubernetes · Nix/NixOS · Slurm · L ^A T _E X · Typst
Web Frameworks: Django · Flask · Starlette · Phoenix · Next.js · React · Remix · React Native
Other Technologies: gRPC · MongoDB · NumPy · Pandas · PostgreSQL · PyTorch · Redis · scikit-learn · TensorFlow

HONORS & AWARDS

William Lowell Putnam Math Competition, 21/120	Top 700 in North America (2025)
IMO Invitational Camp	Top 16 in Germany (2025)
2x IOI Invitational Camp	Top 10 in Germany (2024, 2023)
2x USAMO Qualifier, 266.5/300	Top 200 in the US (2024, 2023)
2x USACO Gold	Top 1000 in the US (2023, 2022)
