EDUCATION

University of Michigan - Ann Arbor	Expected Graduation: May 2028
B.S. Honors Mathematics & Statistics, Minor in Computer Science	GPA: 3.9/4.0
Relevant Coursework: Honors Analysis · Probability Theory · Stochastic Processes · Combinatorics & Graph Theory · Deep Learning · Machine Learning · Reinforcement Learning	

EXPERIENCE

OpenAI <i>Incoming Software Engineering Intern</i>	Sep 2026 – Dec 2026
Embedder YC S25 <i>Incoming Software Engineering Intern</i>	Jun 2026 – Aug 2026
Flowly AI <i>Founder · YCombinator Fellow</i>	Feb 2026 – Present
- Built Go API gateway with compiled DAG engine for autonomous AI workflow orchestration. - Engineered sandboxed execution pipeline using Docker and gVisor for isolated AI financial actions. - Developed Apache Arrow analytics pipeline enabling vectorized queries across federated datasets.	
Tencent <i>Senior Software Engineer</i>	Jan 2026 – Jun 2026
- Built distributed cloud infrastructure powering 10,000+ concurrent jobs across internal services. - Developed TB-scale NAS-backed storage and networking systems for enterprise compute infrastructure. - Automated QA validation pipelines in Python, reducing manual verification workload by 30%.	
Univ. of Michigan & Cambridge Univ. <i>ML & Algorithm Developer</i>	Jun 2023 – Dec 2025
- Built MATLAB and Python simulation framework for evaluating high-dimensional path planning systems. - Optimized A* and RRT algorithms in dynamic environments, leading to ICCSM 2024 publication. - Parallelized large-scale parameter sweeps using Docker and Slurm distributed compute orchestration.	

PROJECTS

ML Integral Solver in Custom Lean4 Compiler	Sep 2025 – Present
- Built neural-symbolic solver combining Transformers, SymPy, and AST/GNN pipelines for integration. - Engineered isolated symbolic execution and GPU inference pipeline using L-BFGS optimization. - Developed collaborative Lean4 theorem-proving compiler with Docker, Kubernetes, and Yjs syncing.	
Nightfall Minecraft Server	Jun 2022 – Jun 2025
- Built distributed Minecraft network reaching 2M+ registrations and 2K daily active players. - Designed low-latency backend architecture using NGINX, MySQL, Redis, and custom PHP services. - Optimized async I/O and Redis caching to sustain thousands of requests per second across proxies.	

TECHNICAL SKILLS

Programming Languages: PHP · C++ · Java · JavaScript · Python · MATLAB · TypeScript
Infrastructure and Tools: Ansible · Docker · Git/GitHub Actions · Kubernetes · Nix/NixOS · Slurm · L ^A T _E X · Typst
Web Frameworks: Django · Flask · Starlette · Phoenix · Next.js · React · Remix · React Native
Other Technologies: gRPC · MongoDB · NumPy · Pandas · PostgreSQL · PyTorch · Redis · scikit-learn · TensorFlow

HONORS & AWARDS

William Lowell Putnam Math Competition, 21/120	Top 700 in North America (2025)
IMO Invitational Camp	Top 16 in Germany (2025)
2x IOI Invitational Camp	Top 10 in Germany (2024, 2023)
2x USAMO Qualifier, 266.5/300	Top 200 in the US (2024, 2023)
2x USACO Gold	Top 1000 in the US (2023, 2022)
